DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, are drawn to a method for determining molecular crystal structures.

Group II, claim(s) 12-14 and 16-20, are drawn to an apparatus for determining molecular crystal structures.

Group III, claim(s) 15, is drawn to the method of either of claim 13 or 14, which is drawn to an apparatus.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of Group I does not require the apparatus of Group II (i.e., the special technical feature). For example, the controller limitation of Group II is not required to perform the method of Group I, as the functions that the controller can perform can be performed either or in a separate system when used with the claimed method.

Inquiries

3. Any inquiries concerning the *merits* of this communication or earlier communications from the Examiner should be directed to Jeffrey S. Lundgren, whose telephone number is (703) 306-3221. The Examiner can normally be reached on Monday-Friday from 7:00 AM to 5:00 PM (EST).
